SD Technical Schools and Community Colleges in other states:

In most cases, high school graduates will be admitted to South Dakota’s Technical Schools and most community colleges in other states. There will be placement tests given to indicate what course work you will be eligible to take if you haven’t taken your ACT test. There are many program areas available at these institutions and each of these programs have their own requirements. It is important for each student to visit and check out the school that they are interested in to see what specific requirements are needed.
